FULLY CUSTOMISABLE FIRE BED

Adjust flame styles and colour options to suit your mood

The new Henley Electric Fire Collection brings the charm of a real fire into your home with cutting-edge 3D Flame Projection Technology. Each fire features a fully customizable flame display and fire bed, allowing you to tailor the look and ambiance to suit your space and personal style.

The fire bed is filled with beautifully detailed high-quality ceramic logs, glowing embers, or shimmering crystals, creating a captivating visual effect as the flames dance and flicker before your eyes.

For those seeking a heightened sense of realism, the electric stove is available with the option of Deluxe Logs, an exceptional feature that brings the authentic charm of a real fireplace into any setting.

Expertly crafted from high-quality ceramic, each log is hand-scorched and charred to achieve a remarkably lifelike appearance. The craftsmanship ensures crisp, realistic flame visuals, and the warmth of beautifully arranged timber logs.

Each model and size features its own distinctive log layout, designed to complement the stove's individual character. The logs are securely positioned for effortless installation, making this upgrade as practical as it is visually striking.

Designed with versatility in mind, the Henley fires offer three elegant installation options. You can opt for a front-facing installation with both sides enclosed for a clean, traditional look. Alternatively, a corner installation allows visibility from either the left or right side, while a three-sided panoramic setup offers a stunning three-sided view of the flames from the front and both sides.
